Cuatrimestre: 4^a CUATRIMESTRE

APPEARENCE AND HEALTH

Patient admitted for appendicitis, complicated by pain and discomfort in walking and moving, thanks to the fact that she arrived on time it was not complicated by chronic appendicitis.

Patient name: Danna castellano hernandez

His age: 20 years with a weight: 55 kg, height: 1.60 m, his breathing rate is 14-19 for minute, with a temperature of 38 C° with his blood pressure 125/90 mmHg

Her skin tone is light, with black hair and black eyes. She is tall and thin, with bulging eyes and a pretty smile, very optimistic for her diagnosis, which requires an appendix operation. Thanks to being treated and his illness not becoming more complicated, he will have a very safe and quick recovery from the operation, also thanks to the treatments and care of the nurses
