Hello, good afternoon doctor, what do you recommend for the fever?

Hi good afternoon

I recommend taking one pills eighth hours

Drink plenty of fluids to stay hydrated. Wear light clothes.
Use a light blanket if you feel cold, until the chills go away.

I hope that helps you and you get well soon :)

Hello, good afternoon doctor, what do you recommend for the flu?

Hi good afternoon

I recommend Analgesics/antipyretics, to relieve headache and general discomfort.

For example, in a painkiller you could take an acetaminophen every 8 hours

Or also a loratadine every 24 hours

I hope that helps you and you get well soon :)

Hello, good afternoon doctor, what do you recommend for the cough?

Hi good afternoon

The cough has a limited duration. It is older in the first few days and decreases from the first week. Sometimes it lasts 2-3 weeks.

I recommend good hydration (drinking water), nasal washes with saline serum, and the use of analgesics are sufficient

I hope that helps you and you get well soon :)

ENGLISH

Hello, good afternoon doctor, what do you recommend for the stomachache?

Hi good afternoon

For people with a sensitive stomach or stomach problems, TYLENOL maybe a better analgesic option

I hope that helps you and you get well soon :)

Hello, good afternoon doctor, what do you recommend for the headache?

Hi good afternoon

Headache is very common, due to many factors that we go through on a day-to-day basis, if the pain is very repetitive you have to take more tests and checks to get to the bottom

At the moment I recommend you take a pill and that will be enough

I hope that helps you and you get well soon :)
