

This is me

My Personal Information

My name is Ricardo Córdova Santiz, I am 19 years old, I am from Comitán de Domínguez Chiapas, I study a degree in veterinary medicine at the UDS University - Universidad del Sureste. My favorite subject is anatomy and English, the subject I don't like at all is Mathematics.

I have a pet called spots, we found it lying so we decided to adopt it, the animal we found it in a bad state, it had a lot of mange so we decided to bathe it with oil to cure it and in a few days we checked the improvement of the animal and today it is fine and we have been 9 months with the dog that is happy.

I live with my mom, siblings, aunts and grandparents. The names of my brothers are Javier Cordova Santiz who is 24 years old and Pablo Córdova Santiz who is 21 years old, both are studying a bachelor's degree. My mom and aunt work in a chicken shop, my grandparents started a business that they only manage.

My grandfather is an honest man. I had an uncle and aunt who were merchants. I have an interesting job since I must take care of a store that normally sells like 1800 a week there is an old man always outside the store waiting for me to give him a bottle of water since he says that given away the water tastes better, this is an easy job since I just have to be sitting and my brother always comes to accompany me, We have an answer to boredom and that is to listen to music and sing it.

I like to play a lot of football, but my school no longer gave me time to go to training so I left it and focused more on my studies, one of my hobbies is playing video games such as Call of Duty, Spiderman, Fifa, Fornite, Good of Wars, etc.

My brothers do not like to play video games they are very focused on their studies since they chose a difficult degree.

My favorite song is the satisfaction song out there I like all kinds of music.

Now I am focused on my studies.
