# MY PERSONAL BLOG

Hello, my name is Ibssen Jair Castorena Uriostegui. I graduated from a degree in veterinary medicine and zooctenia. I am 22 years old. I am from the municipality of Comitán de Domínguez, Chiapas. My parents are originally from the state of Guerrero. I chose the career because I like to work with animals and my Dad has a ranch and I help him vaccinate, deworm, decorate or check them when they are sick. I find the career very interesting. I like to learn more, learn to do surgeries, new things that happen. I had already been there before but for personal reasons I left and Well, here I am resuming my career again. Apart from that, I like to play soccer. The position I play is forward, although sometimes I play midfield or defense, a bit of everything. I was on a team when I was in high school, but well, I left and now that's it. I play sometimes when they invite me. Apart from that, I really like driving, I really like cars and well, this would be my personal blog for my English subject.
