ENDANGERED FAUNA

THE TREAT OF EXTINCIÓN

TWO SPECIES THAT MAY BECOME EXTINCT IN THE 21ST CENTURY

Today there are many endangered species in danger of extinction.

In some cases there are so few animals of that species left.

That it is very difficult for it to survive or coexist today.

Currently the organizers

They are making lists of endangered animals.

There are many ways in which we can save a species

Reproduce the animal in captivity with new biotechnologies.

Protecting your ecosystem

Panda gigant

It is one of the best known animals in danger of extinction.

This animal is only found in China and only 1,000 specimens are known to exist at present.

Black rhino

Gives to one of the animals endangered by uncontrolled hunting since 1970.

Currently, almost 95% of the species has been lost.
