HEPATOBILIARI

WHAT IS?

Organs and ducts that make and store bile (fluid produced by the liver and helps digest fat), and release it into the small intestine

Symptoms

Constant abdominal pain. Swelling in the abdomen or extremities. Weightloss. Hematomas or bruises on the skin. Color change in feces and urine. Jaundice or yellowing of the skin, mucous membranes, or eyes.

treatment

The common treatment for gallstones is surgery to remove the gallbladder. Doctors can sometimes use nonsurgical treatments to treat cholesterol stones, but pigment stones usually require surgery.
