UNUSUAL HOMES

THE KERET HOUSE

The Keret house is the narrowest house in the world. It is 152 cm wide and its only resident, besides being its designer, is; Jakub Szczęśny. It was created with the purpose of not wasting any urban space, which is why it was built in the middle of two buildings in Poland

HOUSE UPSIDE DOWN

It was built as a tourist attraction in Trassenheide Germany, by Polish architects Klaudiusz Golos and Sebastian Mikiciuk as part of the "Upside Down World" project. It allowed visitors to see the world from a different perspective. Everything in this house, including the furniture, is the other way around.

THE TOILET HOUSE

The mayor of Suwon, Sim Jae-Duck, designed this house in the shape of a toilet to honor the founding of the "World Toilet Organization." The house has a beautiful rooftop balcony that has flags of many countries hoisted there. This house costs over a million dollars, and is located in South Korea

TRANSPARENT HOUSE.

Located in Tokyo, Japan, it is a completely transparent house, full of natural light but without privacy, it was built by "Sou Fujimoto Architects"
