

**Mi Universidad**

*Nombre del Alumno: Carmi Jesua Alvarado Rodríguez*

*Nombre del tema: Partes del cuerpo*

*Parcial: 2*

*Nombre de la Materia: Inglés*

*Nombre del profesor: Mike Anderson Hernández Ordóñez*

*Nombre de la Licenciatura: Enfermería*

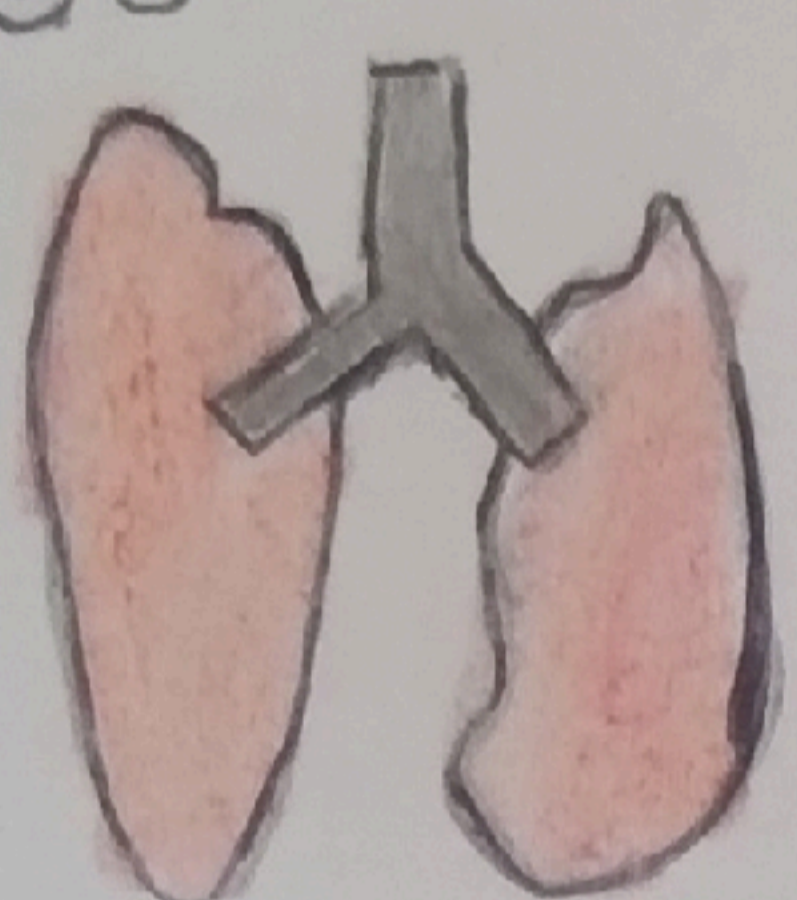

*Cuatrimestre: 2*

# BODY PARTS

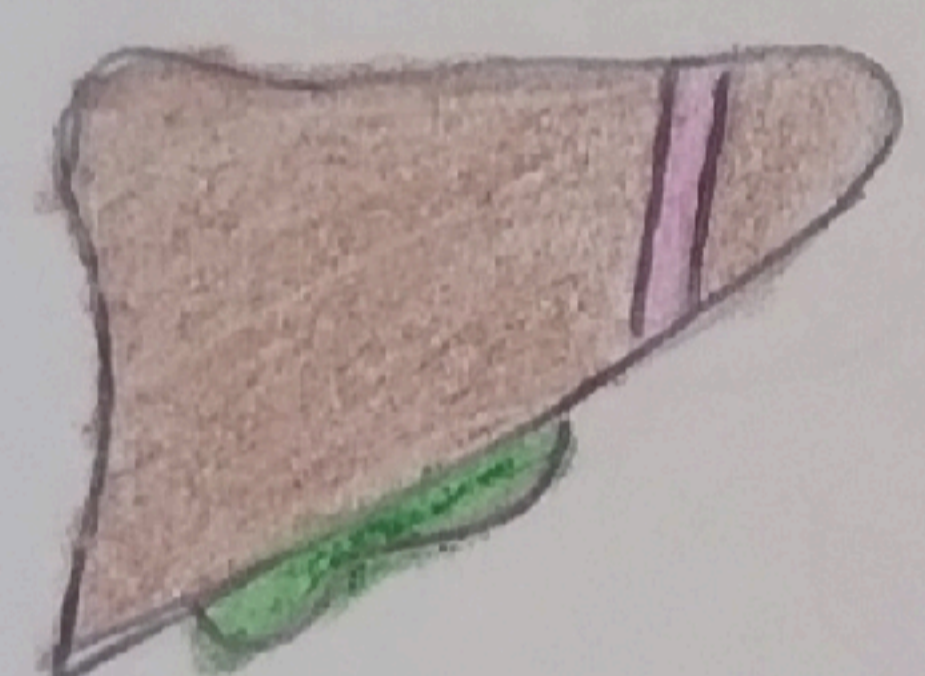

THYROID

LUNGS

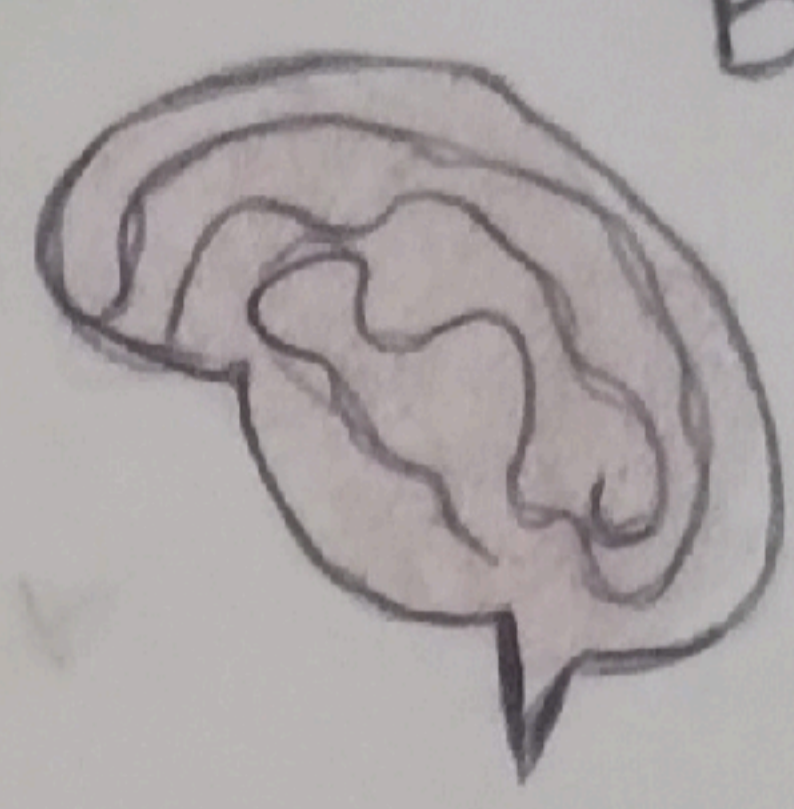

LIVER

INTESTINES

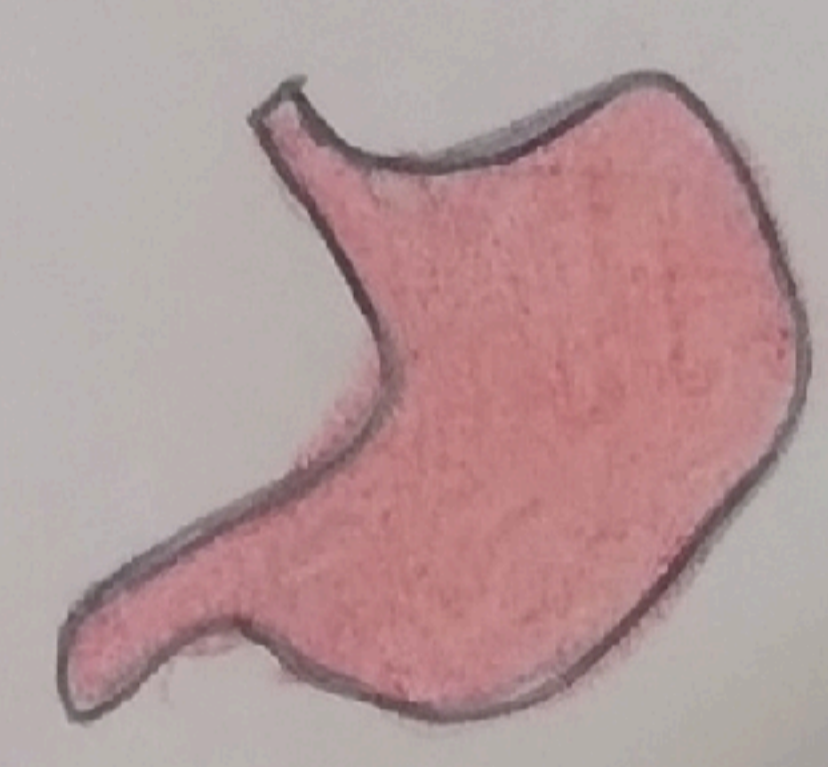

BRAIN

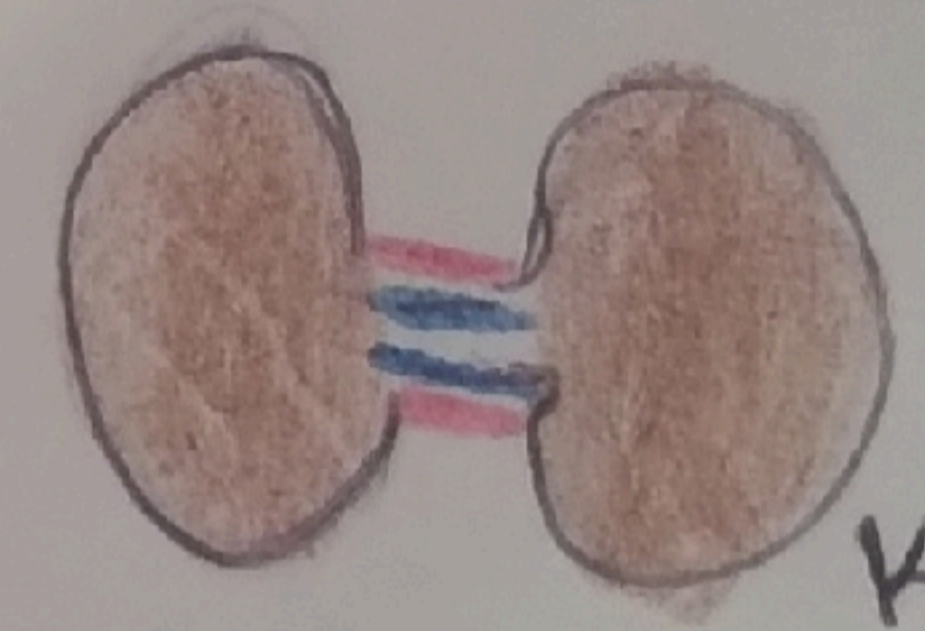

HEART

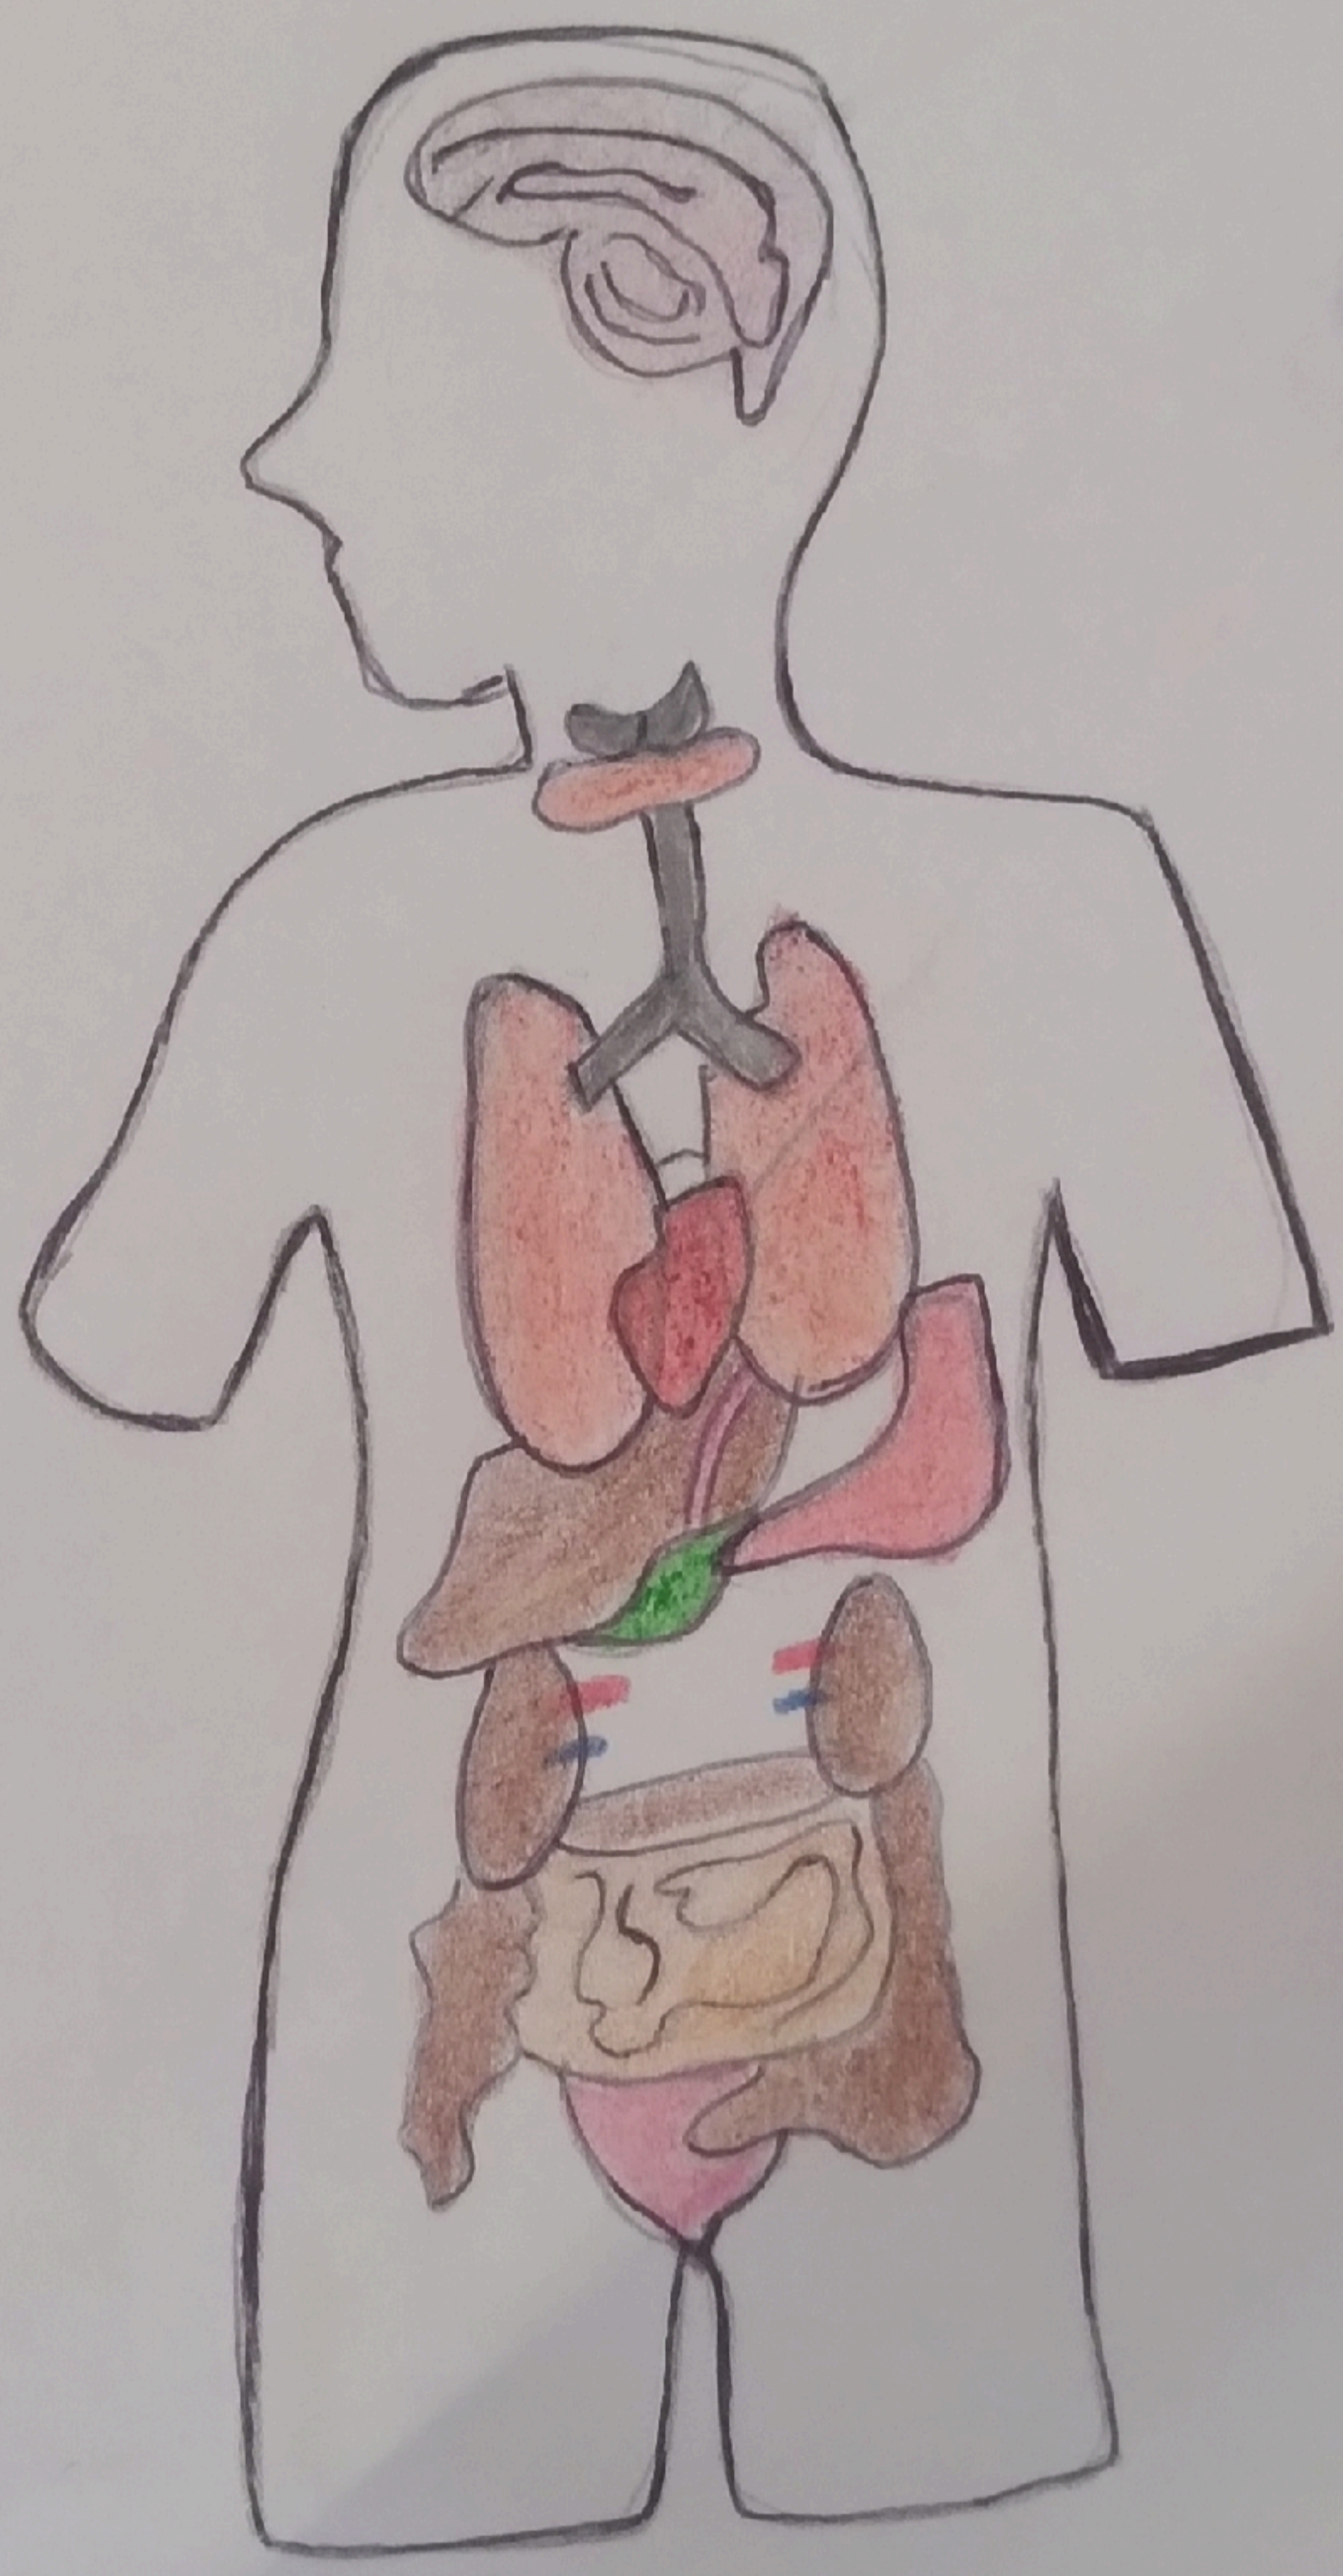

STOMACH

KIDNEYS

BLADDER

1. The heart is what pumps blood to our body, the right atrium is what brings blood to the pulmonary vein, the left ventricle is what brings blood to all our systems
2. The lungs are a pair of spongy organs which when inhaled, air enters the lungs and the oxygen from that air passes into the blood.
3. The brain is an organ that is responsible for regulating and coordinating what we do, which also contains our thoughts and emotions.
4. The stomach helps us digest food by mixing it with digestive juices, turning it into a dilute liquid.
5. The intestine is what continues the digestion process, the small intestine is a part of the digestive system.
6. The liver regulates most of the chemical levels in the blood and also excretes a product called bile.
7. The hands are capable of performing a variety of functions such as touching, feeling, holding, manipulating, caressing, they are a vital part.
8. The feet have an important function in the human body, the main one being support they allow us to move quickly.
