## **My dream's house**

The house of my dreams is a chalet not far from the city. On the second floor, there are four bedrooms. The first room with a full bathroom and a jacuzzi is mine. There is a living room, with a gray sofa, there is also a turquoise armchair and I have a small coffee table. My living room has many family paintings and curios that make it cozy. There is a floor lamp, and French windows overlooking the garden; a 65" television with a play station and a wireless phone. My dream house on the first floor has a fully equipped kitchen, with refrigerator, oven and has a door to the garden. There is in a bathroom with shower and bath. Lastly, there is a study room with a desk and my computer. There are also three bedrooms and a bathroom. In the guest bedroom, there is a closet, a bed, of course; with a nightstand. There are many family photos and a television. My house is really beautiful and spacious. It is big and cozy. In the garden there are many fruit trees. There is a Patio in front of the house, and there is a driveway and gate. The walls of my house are pure white, because white makes the house bigger and they look fresh and I love it. And clean, fresh and I love that look.
