Grado: 2do. Cuatrimestre.

My dream house.

I like country houses with a large field, that have space for my dog to have fun, I would also like it to have a garden and an orchard to grow vegetables or other fruits. I would like my house to have a botanical-type garden inside the house to go and contemplate the collection flowers such as succulents, orchids and how not to read a good book with a cup of coffee. The living room should have a nice sofa with a coffee table but it should be made of rustic wood or a piece of tree, in a separate room a living room or office type with books. It must have at least 3 bedrooms, there is furniture and televisions in each one and 2 bathrooms with large windows and there are very wide doors. The kitchen must have a digital stove and an oven. A breakfast area with rustic lamps, the table must be large enough for 6 to 8 people, there is a garden in the back and it has a second kitchen to hold parties or a barbecue, there is a wood oven and a hoe, so you can live together as a family. In front there is a large space for cars, there are several types of fruit trees.
