

MICHEL GARCIA LUIS
Determino la función

① $y = \frac{2}{2} - 2$

② $y = \frac{2}{1} - 1$

De lamina 2 puntos que poseen por los
redos.

$$y = 3x + \frac{8}{1}$$

$$m = 3x$$

$$P_1 = (0, 8)$$

$$P_2 = (1, 11)$$

$$y = 2x - \frac{1}{1}$$

$$m = 2x$$

$$P_1 = (0, -1)$$

$$P_2 = (0, -2)$$

$$y = 4x - \frac{2}{1}$$

$$m = 4x$$

$$P_1 = (0, -2)$$

$$P_2 = (1, 0)$$
