# Hospital Jobs and personnels

## ADMINISTRATIVE AND FINANCIAL

It is the personnel that carries out the functions of managing all operational aspects, paperwork, procedures and logistics, in addition to the financial and accounting area that manages the resources and income of the company.

## MEDICAL AND SCIENTIFIC

It is all personnel trained to provide general and specialized medical care to any person who presents to the hospital to receive care, treatment of any illness, disease.

## HUMAN RESOURCES AND PERSONNEL ADMINISTRATION

In all hospitals there are areas corresponding to the management of medical, administrative, operational or maintenance personnel to ensure that the hospital has the necessary personnel, professionals

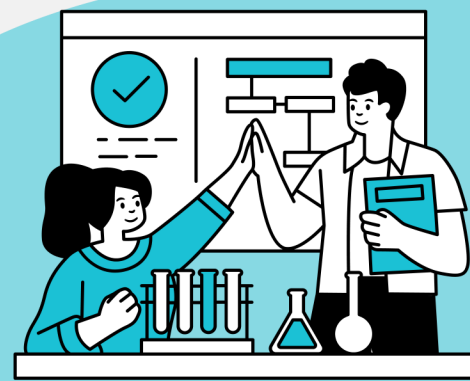

## MAIN MEDICAL POSITIONS IN A HOSPITAL

There are many areas of medical specialties in which treatment and medical care can be given to patients in a timely manner for each condition, treatment or illness that occurs.

## SPECIALIST DOCTORS

Specialist doctors are those who see cases of patients that require greater knowledge or specialty of certain conditions.

## NURSING STAFF

It is those personnel who deal directly with the patient and are assigned to their care, to attend to them and provide medications, as well as evaluate their physical needs and provide moral support. The pers
