Pillow

Soft, thin cloth bag, usually rectangular, filled with a soft material, such as foam, feathers or some fiber, which serves to support the head

what is it for?

The function of the pillow is to provide correct alignment of the spine in the cervical part. It should reduce muscle tension, allowing the maximum state of rest of the shoulder and neck muscle area.

Types of pillows

Memory foam pillows.
Latex pillows.
Feather or down pillows.
Pillows made of synthetic materials.

Gauze

It is a mesh, with more or fewer threads.

what is it for?

Gauze plays a crucial role in properly treating a wound as it can be used to clean, disinfect, protect or promote the healing process of any injury.

Main types of gauze

Sterile gauze.
Non-sterile gauze.
Cotton gauze.
Hydrophilic gauze.
Impregnated gauze.
Adhesive gauze.
Gauze for drains

Bedpan

It is a bowl-shaped container used to collect excrement.

what is it for?

used to collect urine or feces

Catheter set

Indicated for temporary internal drainage from the ureteropelvic junction to the urinary bladder after dilation or incision of a stricture.

what is it for?

A central venous catheter, also called a central line, is a long, thin, flexible tube used to deliver medications, fluids, nutrients, or blood products over a long period of time, usually several weeks or more.

The types of IV that could be used are:

peripheral IV.
Central venous catheter.
Short catheter.

Disinfectant

They are substances that are used to destroy microorganisms or inhibit their development

what is it for?

to destroy germs, such as viruses, bacteria and other microbes that cause infections and diseases.

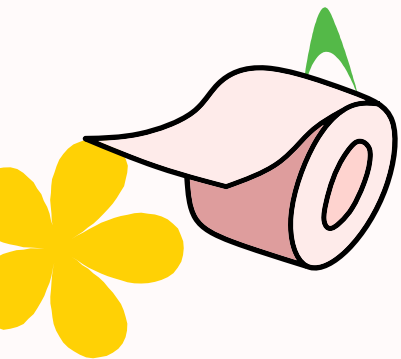

Types of disinfectants

Halogen disinfectants
Disinfectants with quaternary ammoniums

ordering supplies

are substances, materials, devices or instruments used alone or in combination for the diagnosis, treatment, rehabilitation and prevention of diseases

Surgical tape

It is a hypoallergenic paper tape, latex-free, soft on the skin and with minimal adhesive residue.

what is it for?

It is used to heal wounds and secure medical tubes.

Types of tape

Microporous paper surgical tape.
MICROPORE

Sterile cup

They are plastic containers that are used to collect, store and analyze urine in the laboratory.

what is it for?

It is essential to ensure that the urine samples taken for the purpose of performing the test that will help detect health problems are free of external contaminants.

Types of tape

PP plastic bottle with sterile screw cap-A
60 ml
PP plastic bottle with screw cap 120 ml

Specimen tube

It is a cylindrical glass container, closed at one end, used for small-scale experiments and analysis, especially in the laboratory.

what is it for?

It is used for determinations in serum and clinical chemistry.

Tube classification

serum tubes
plasma tubes
Whole blood tubes

ordering supplies

are substances, materials, devices or instruments used alone or in combination for the diagnosis, treatment, rehabilitation and prevention of diseases

Scissors

They are very suitable for cutting tissue or cutting dressings and suture materials due to their strong construction.

what is it for?

They are used to cut tissues or cut dressings and suture materials due to their strong construction.

types of scissors

Ligature scissors.
Dissecting scissors.
Bandage scissors.

Hospital gown

The gown protects the skin and prevents clothing from becoming soiled when performing procedures that may generate splashes or aerosols of blood, organic fluids, secretions or excretions.

what is it for?

to protect yourself from any damage that chemicals may do to clothing or people.

Types of gown

Polyethylene gown with brackets.
Polypropylene TNT gown with front closure with velcro.

IV Bag

is the administration of liquid substances directly into a vein through a needle or tube inserted into the vein

what is it for?

quickly administer fluids and medications.

Sheet

Disposable patient blanket

what is it for?

It is used to occasionally keep people warm out of bed.
