Large Species

DELIVERY DATE: Wednesday, 27<sup>th</sup> November

2024

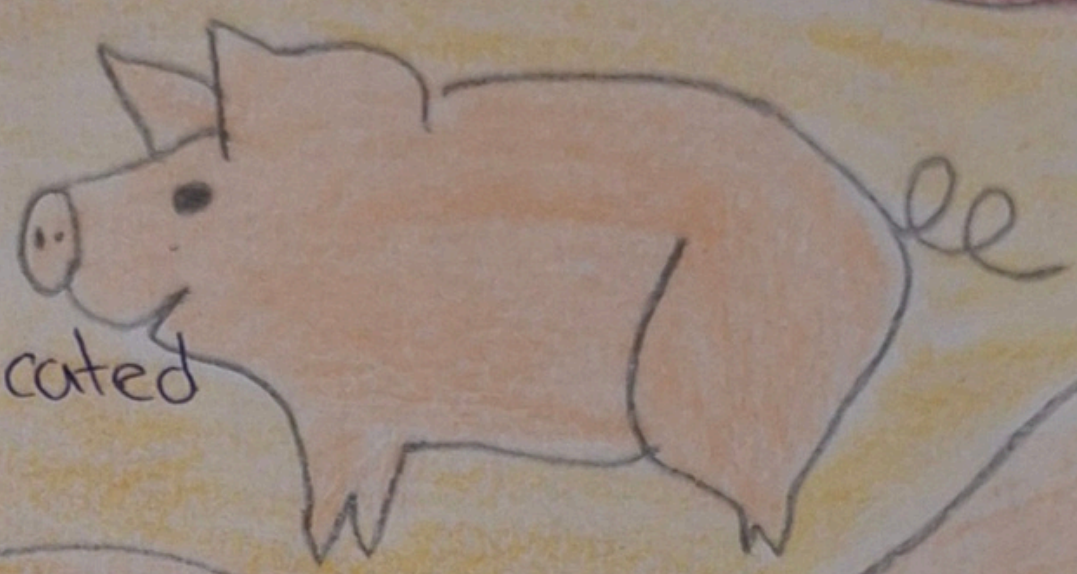

# Small and Large Species

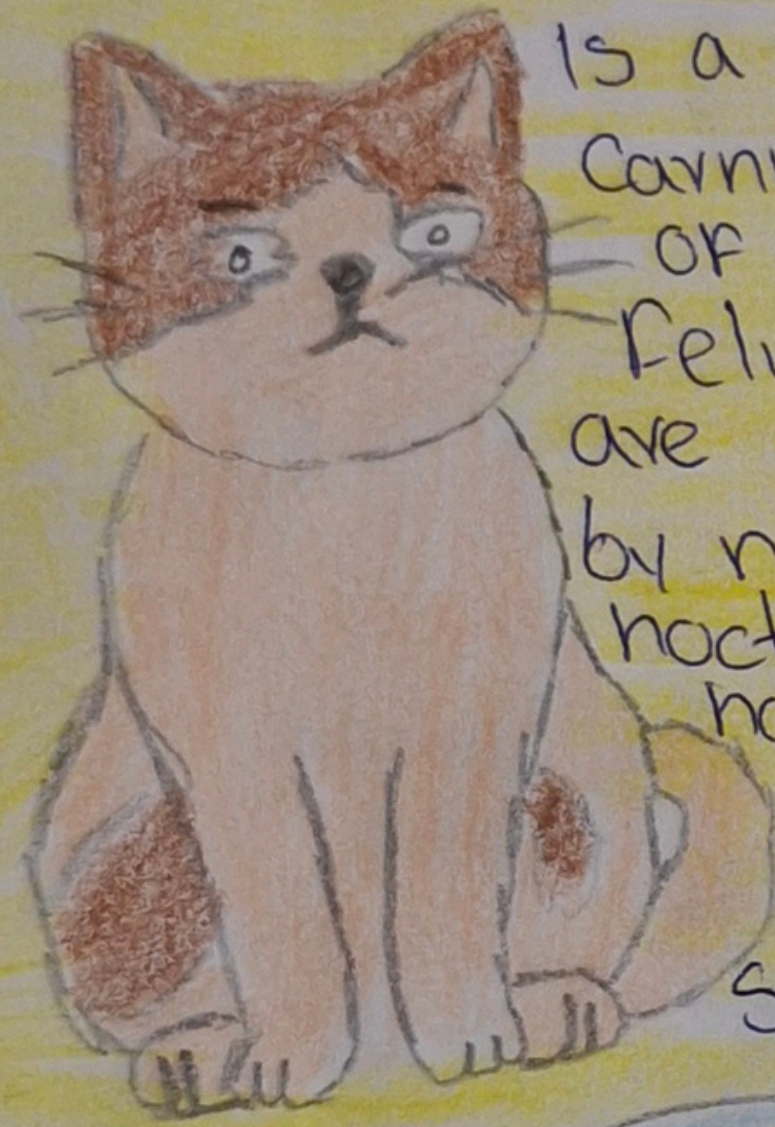

Domestic Mammal of the Canid Family, of very diverse size, shape and foot depending on the breed, which has a very fine sense of smell and is intelligent and very loyal.

The pig is a mammalian animal that can be found in the wild or domesticated

The domestic cat is a species of Carnivorous mammal of the family Felidae. They are predators by nature, with nocturnal hunting habits they possible prey behind multiple species of birds

Birds are vertebrate animals, that is, they have a backbone, just like a cat or a rabbit.

The first goats arrived in America more than 400 years ago. these livestock adapted very well to the national territory and soon showed how profitable this activity was

Equidae are a family of placental mammals in the order perissodactyla, containing only one living genus, equus, and numerous fossil genera
