Home or away?

A Answer these questions. Then read the passage.

- At what age do most young people leave their parents' home in your country? At 18 years old
- Do some young people live with their parents after they get married? yes

Leaving Home

Young people leave their parents' homes at different ages in different parts of the world. In the United States, a lot of college students do not live at home. They often choose to go to college in different cities – away from their parents. At college, many live in university housing. After college, most people prefer to live in their own homes. They often live alone, but some people rent apartments with others. These people are called *roommates*.

By the age of 22, few young people in the United States live with their parents. Families stay together longer in many Asian countries and cities. In Hong Kong, for example, nearly all university students live with their parents. Rents in the city are very expensive, and few students have the money to pay for their own apartments. Very few young people live alone or become roommates in a shared apartment. Many young people in Hong Kong continue to live with their parents even after they marry.

B Check (✓) True or False. For statements that are false, write the correct information.
