DESCRIBE

Here are three persons who are working, making some letters with recycled material so they were painting them. They were doing this for an event that we were going to have.

They look focused but enjoying the process, actually we were happy it was late but we were having fun together. Did this take a lot of time so at the end we were really tired because we did a lot of things to do a good decoration what took us approximately 3 hours. They also have to wait until the paint were dry. Although the truth is that we didn't finish it completely we just prepare things so that the next day we return to decorate everything well.

One girl is wearing beige pants and a black shirt with beige shoes, the another girl is wearing brown jeans with a white shirt and the boy is wearing a blue short and a black shirt too with converse. Those are the clothes they were wearing that day.

HOW YOU SAY THE TIME?

If want to say the time after thirty we use "to" and to talk about before thirty, we use "past" for example:

7:05 is five past seven
10:25 is twenty five past 10

and

6:40 is twenty to seven
8:50 ten to nine

If we refer to thirty we have the option to say "half" like this:

10:30 It's ten and a half
4:30 It's Four and a Half

And also we use "quater" in these cases:

9:45 It's quater to ten
3:15 It's quater past three

And lastly(for any hour this is the way to say sharp):

1:00 l'ts One O'clock
