Trabajo: Investigación sobre Argentina

Argentina is located in South America, is the third largest economy in Latin America, Within its territory of 2.8 million square kilometers, the country has abundant natural resources.

Sky blue and white were the colours that identified the Royal and Distinguished Spanish Order of Charles III. In the center of the white stripe of the flag is a sun with a human face known as the sun of May, the Inca sun or the sun of war.

The peso (symbol: \$; ISO 4217: ARS) is the legal tender of the Argentine Republic since 1992, when it replaced the austral. It was known as the "convertible peso" due to its similarity to the dollar from its creation until the amendment of Law No. 23,928 on Convertibility in 2002. It began to circulate on January 1, 1992 under the aforementioned law of 1991

Argentina is the world's third largest food exporter, and the agricultural sector represents 15.7% of gross domestic product (GDP) and 10.6% of tax revenues in 2021

Argentina citizens are argentinian

The Argentine soccer team has had great achievements such as the Copa America and the World Cup

Lionel Messi is Argentina's best-known footballer

Argentine flora and fauna are made up of species from 18 different ecoregions where some 115 different ecosystems develop. In the north of the country there are tropical and subtropical climates, in the center and south there is a temperate climate and the extreme south is represented by a cold climate.
