ALUMNA: ESTRELLA GUADALUPE RUIS GONZALEZ.

FECHA: 28 OCT-16 NOV.

DISEASES IN CHILDREN .

RHINOPHARYN.

better known as the common cold, it generally has a viral cause

SYMPTOMS:

It usually produces symptoms such as: nasal congestion, fever and cough.

ACUTE OTITIS

quite common infection in children under 3 years old

SYMPTOMS:

The most common symptoms are pain in the affected ear, fever and curiously, diarrhea, especially in young children.

BRONCHIOLITIS.

Bronchiolitis is the swelling and buildup of mucus in the bronchioles, the smallest airways in the lungs. It is almost always caused by a viral agent and its incidence increases in winter.

SYMPTOMS:

runny nose, nasal congestion, cough and sometimes, mild fever.
