

# NURSING AND ITS RELATIONSHIP WITH OTHER SCIENCES.

## MEDICINE.

Nursing and medicine are closely related, as nurses work in close collaboration with doctors to provide medical care to patients.

## BIOLOGY

Nursing is based on biological principles to understand the functioning of the human body and how diseases affect patients.

## PHARMACOLOGY

Nurses need to understand medications and how they work to administer them safely and effectively.

## PSYCHOLOGY

Nursing also draws on psychological principles to understand human behavior and how illness and stress affect patients.

## NUTRITION.

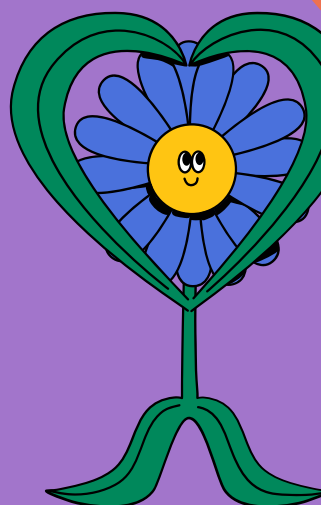

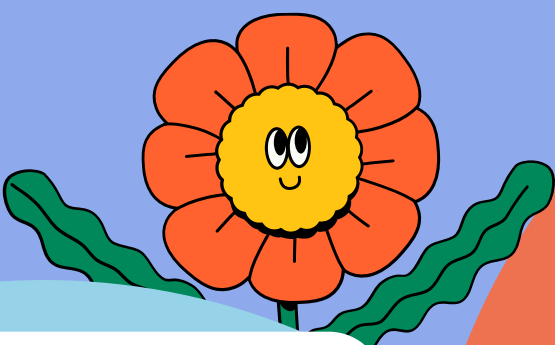

Nursing also involves understanding nutritional principles to provide patients with healthy eating advice.

## COMPUTER SCIENCE

Nursing uses technology to record and manage patient information and access resources and tools for healthcare.

## ANTHROPOLOGY

Nursing draws on anthropological principles to understand cultural differences and how they affect healthcare.
