Ulise: Hello, good morning to all of us, we are the ghost cowboys of the west, we are two male ghosts and a female ghost.

Andrea: The cowboy ghost is a legendary carácter in american folklore, especially popular in the western united states. Legend has in that the cowboy ghost is the spirit of a cowboy who rides across the plains and prairies, seeking redemption for some mistake or crime committed in life.

Antonio: Origins of the legend: Some attribute its origin to the figure of the cowboy, symbol of the american west. Others relate it to the legend of Washington Irving's "headless horseman." It is also suggested that it may be inspired by stories of real cowboys who died in accidents or duels.

Antonio: We are very dancing ghosts.
