### The house on the river rock

The house was built in 1968 on a rock on the Drina river. A group of people saw that rock as a good place to build the house made of wood and blocks with a cement base.

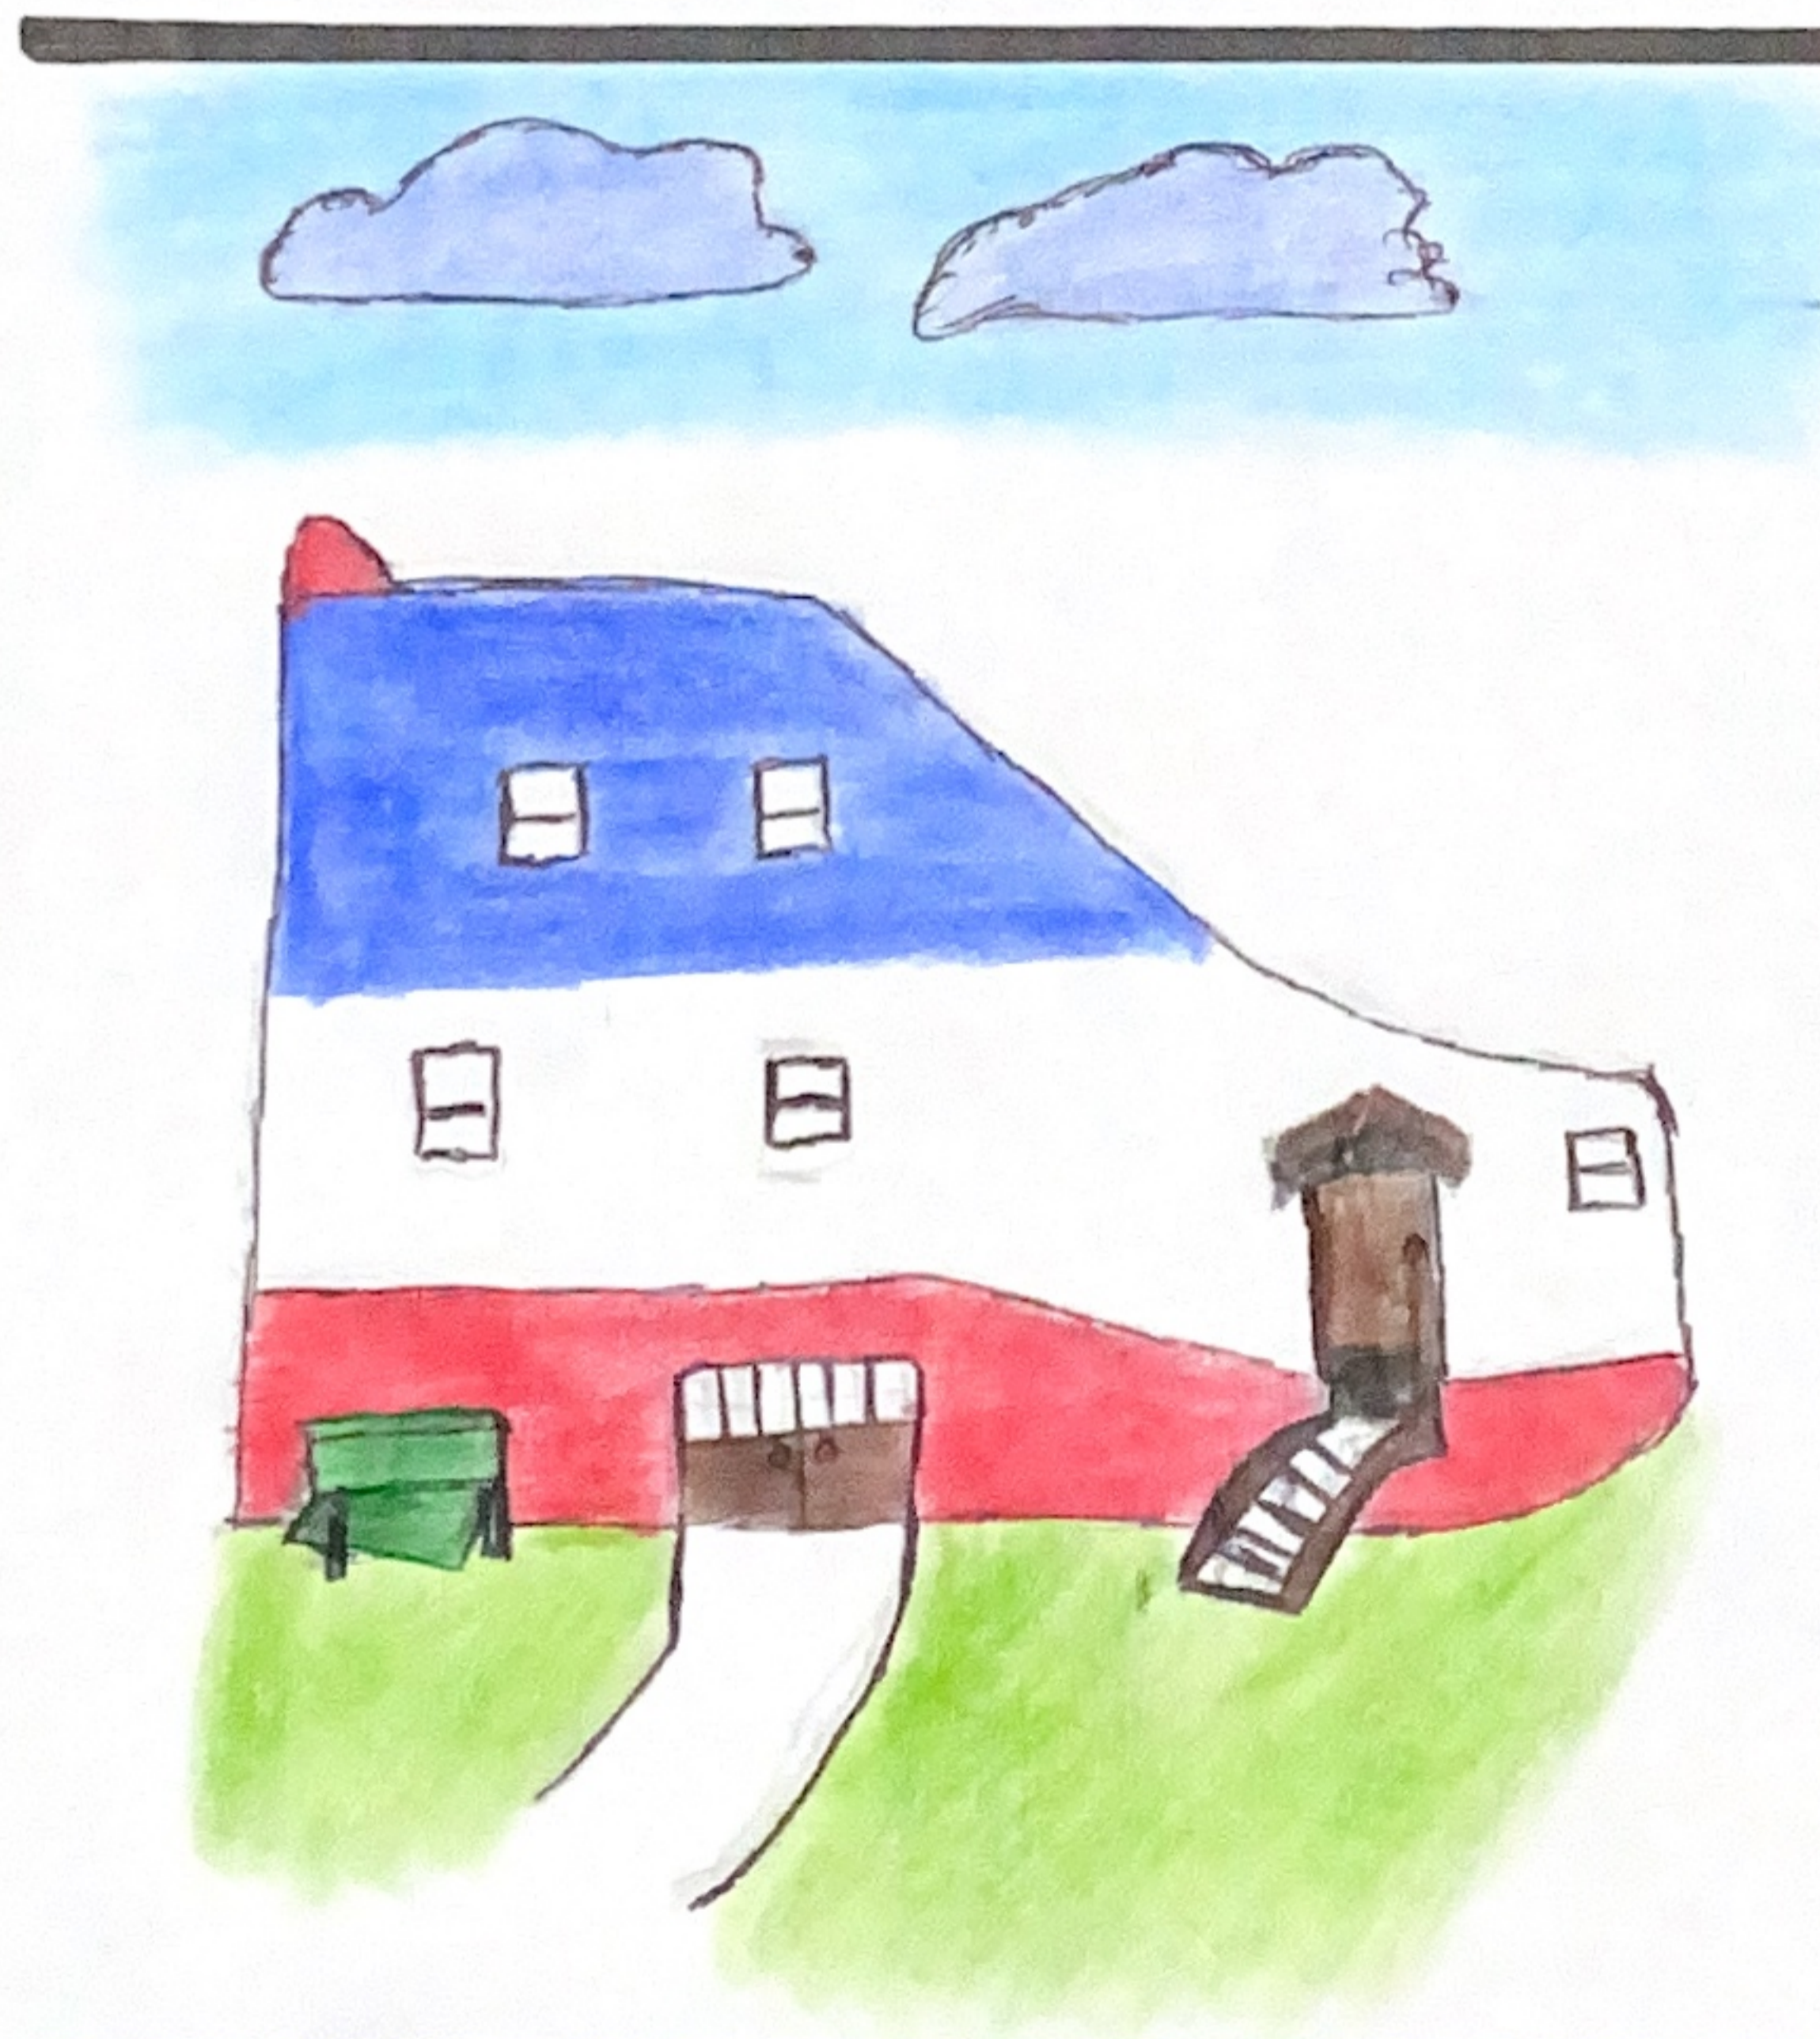

### The tea house

This teapot-shaped house was built in Washington in 1992. It is made of brick and cement, and has bases made of sheet metal.

### The stone house

This house is built in the north of Portugal, it was created in 1974 and is located on a ranch surrounded by windmills. It is made entirely of rock except for the door, window and fireplace.

### The shoe house

This house is literally that a shoe. This construction was the work of businessman Mahlon N. Haines, who was a shoemaker by profession and decided to build a home for his employees in 1948.
