## Unusual Homes

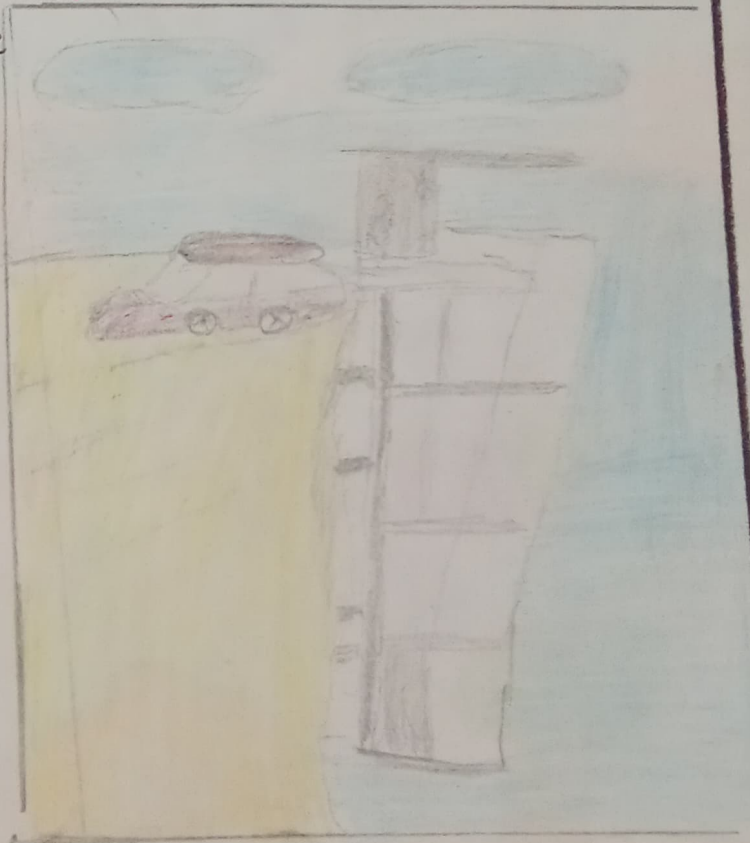

### 1. House of the Sphere (Japan)

- Built by: Japanese architect, Kenjo Tange
- Features: The house is built in the shape of a sphere and features a steel and glass structure that allows for a panoramic view of the surroundings. The house is designed to be self-sufficient and features renewable energy systems.

### 2. Cliff House (Australia)

- Built by: Australian architecture studio, Madscape.
- Features: The house is built into a cliff on the coast of Australia and features a steel and glass structure that allows for a stunning view of the ocean.

## Unusual Homes

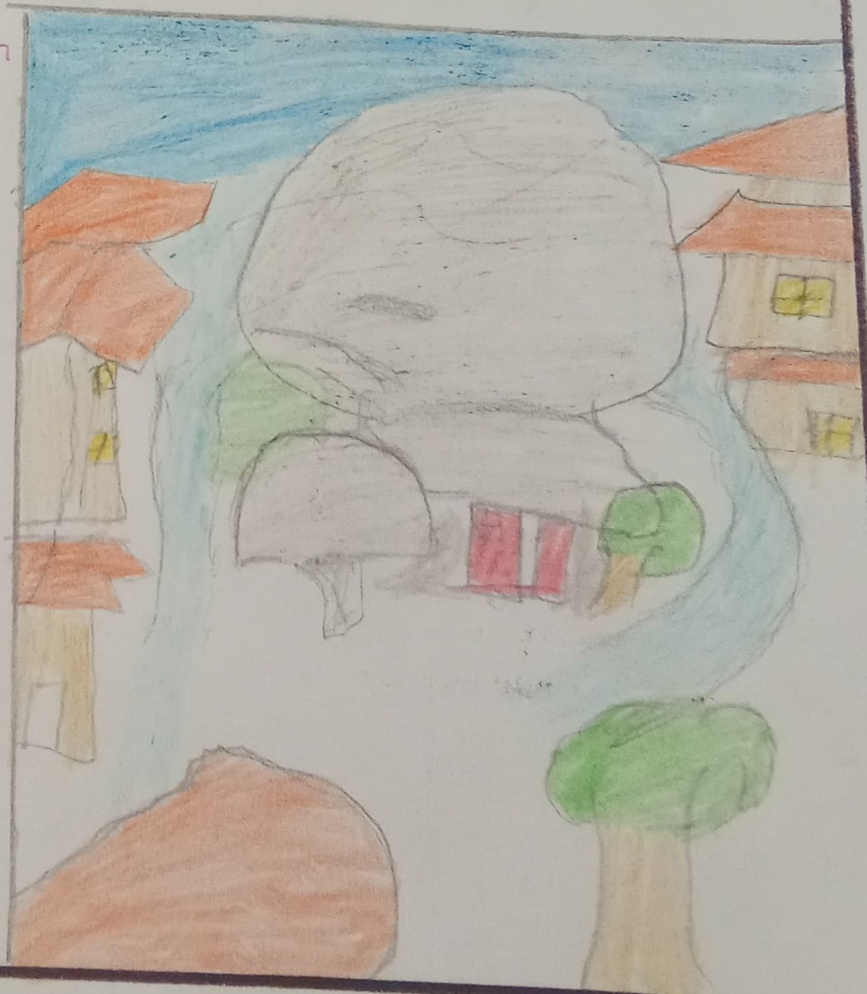

### 3. Three House (Costa Rica)

- Built by: Roberto Dods and his team of architects.
- Features: The house is built around a century-old tree and has a wood and glass structure that allows a panoramic view of the surrounding forest.

### 4. House of the Rock (Spain)

- Built by: Spanish architect Javier Senosiain.
- Features: The house is built inside a natural rock in the Granada region of Spain. The house features a stone and wood structure and offers a stunning view of the valley.
