ACCOUNTANT VS BUSSINES ADMINISTRATO

COMPARATIVE

- 1.- To be a accountant is more intresting than be an Administrator
- 2.- Being a accountant is more difficult than be a Bussines Administration
- 3.- A counter is better with accounts than a Administrator
- 4.- A counter knows more things than a Administrator
- 5.- Study Administration is more boring than study accounting

SUPERLATIVE

- 1.- The best career to learn about bussines is accountant
- 2.- the worst thing about accounting is that you have to do th accounts perfectly
- 3.- A accountant is the most important job for a company

I prefer acoutant, Administration for me is more boring than Accounting. I also good doing accounts, and in accounting you do more accounts than in Administraion. Also you can get more jobs being a accountant than being an Administrator. Both career are similaries but a Accountant do things like: Analyze and record financial transactions, conduct financial audits, prepare financial statements and a Administrator do more things like: Design strategies to achieve the organization's objectives and manage a company's resources, but is more easier that a Accountant can do the work of a Administrator than reverse. Both are important for a bussines but I prefer more account because you can learn more about things fiscal and financial.
