I prefer footballer because is more exciting and funnier than being an administrator, you don't have to do any counts like in Administration, you just play in different amazing stadiums. I think that you have to work harder to be a footballer than to be a Administrator. The careers are so different, because a futbolist have to learn about techniques of game and a Administrator learns about how to direct a company, but that is more boring. To be a futbolist always be more interesting than be an Administrator. I also prefer being a futbolista because you can know many famous people than being a Administrator.
