LUKE'S RESCUE

This story begins with me and my dog his name is Luke, as usual, we go out for a walk.

I go distracted and lost sight of Luke, i called him and looked for him but i couldn't find it. I was very sad until i remembered that my house has security cameras, check the cameras and saw the kidnapping of Luke, i asked for help on my social networks to find my dog, i also offered a reward for Luke to come home, thanks to my friends the news of the disappearance of Luke was announced, that's how we got Luke and his location, at first the thieves didn't want to give us back my dog, but we offered them the reward and they accepted very quickly and that's how Luke returned home safe and sound.

This story made me realize that social networks have good points, i felt very sad, worried and guilty.
