Medicina veterinaria y zootecnia

Cuatrimestre: 2

My Dream Home.

The house of my Dreams will be a beautiful estate surrounded by flowers and green plants. Inside it will have a hallway with armchairs covered in sheepskin and around the walls there will be paintings of very beautiful landscapes, then there will be the kitchen and above it will hang a beautiful chandelier full of a warm light I will have a shelf full of spices so that I can cook and make my desserts there will also be huge Windows that fill with light at dusk the dining room will not be so big since it will only be me and my cat behind the house will be my garage and I will have a truck and motorcycle to go out for a ride on a weekend when you enter the house you will see a beautiful garden with a small dining room to have coffee in the mornings. My room will be of average size and inside it there will be a bed with a kitten blanket and next to it a vanity that will have a mirror with lights and on the vanity there will be makeup and things for my facial and personal care. In the living room there will be a not very large TV and it will have brown armchairs and on them white cushions and these will have embroidery made by me. Next to my farm I plan to set up a clinic to treat my patients and this will also have a comfortable environment for them so they don't get stressed.
