Professional Profile

I am a dedicated and detail-oriented chemical engineer with a passion for process optimization and sustainability. In five years, I will be working as a lead process engineer in a multinational company, contributing to innovative and eco-friendly industrial solutions.

Education

I recently graduated with a degree in Chemical Engineering from the Benemérita Universidad Autónoma de Puebla.

I also completed a certification in Environmental Management and Sustainable Processes.

Work Experience

Intern - PEMEX Refinery, Salamanca

January 2024 – June 2024

I participated in monitoring and optimizing distillation column operations. I also collaborated in quality control analysis and reported improvements for energy efficiency.

Skills and Competencies

I am good at process simulation, laboratory analysis, and data interpretation. I have experience in using Aspen Plus, MATLAB, and Excel for engineering tasks. I also have strong teamwork and communication skills.

Languages and Other Information

Spanish: Native

English: Upper-Intermediate (B2)

Hobbies: Reading scientific articles, hiking, and learning new software tools.

Certifications: Environmental Management and Sustainable Processes (BUAP)
