AGE:
33 years

PROFESSIONAL PROFILE

Practice in the operation of chemical industry processes

Experience in handling various laboratory equipment (sulfur analyzer, automatic distiller, octane meter, flash point meter, densitometer, centrifuges, among others).

Practice in the operation of cooling towers related to the hydrocarbon industry.

Simulator management:

- ChemCad (chemical reaction simulator)
- MatLab (mathematical simulator)

Ideal for creating, designing, and building transformation processes for industrial products in general, benefiting humans and preserving the environment.

Practice in supervising construction projects, as well as generating and budgeting projects.

I am currently studying, In two years I will be finishing my degree in public accounting and finance.

I'm preparing to compete in the professional field, staying at the forefront of job demands. In 5 years I will be working in my accounting office related to projects and sales as a chemical engineer.

SCARLET ALEGRIA SANCHEZ

CHEMICAL ENGINEER
