## *The adventure in the forest*

*It was a sunny day in the forest, and Emily was exploring the winding trails. She was walking along a narrow path, surrounded by tall trees and windflowers. Suddenly she heard a strange noise coming from a nearby clearing. While she was walking, Emily noticed that the noise was getting louder, she approached the clearing and saw a red fox running around a tree the fox seemed to be chasing something, but Emily couldn't see what it was.*

*While she was watching the fox, Emily realized that it was following a trail of footprints in the ground the footprints were small and seemed to belong to a small animal. Emily bent down to examine the footprints more closely, Suddenly the fox stopped in its tracks and looked up at Emily she froze thinking that the fox might attack her but instead the fox approached her and began to sniff her feet-*

*As the fox sniffed her Emily realized that it was searching for something the fox seemed to be following the fox which led her to a hidden spot in the forest. There Emily found a small bird's nest with a bright blue egg in the center the fox approached the nest and began to lick the egg Emily realized that the fox was trying to protect the egg from some danger-*

*While Emily was watching the fox she realized that it was starting to rain raindrops began to fall on the forest, and Emily was starting to rain raindrops began to fall on the egg. But the fox seemed unaware of the danger and continued to lick the egg. Suddenly thunder boomed in the forest and Emily was startled the fox stopped in its tracks and looked up at sky Emily realized that the storm was approaching and that they needed to find a safe place to take shelter.*

*While Emily and the fox were looking for a place to hide the rain began to fall. However the forest became a dangerous place and Emily worried about her.*
