

Realiza una distribución de frecuencia con los siguientes datos.

90, 90, 95, 95, 96, 97, 98, 98, 99, 99, 100, 100, 100, 100, 104, 105, 106, 106, 108, 111, 112, 112, 114, 114, 114, 115, 116, 118, 119, 120. = 30 datos

$$K = 1 + 3.3 \log n$$

$$K = 1 + 3.3 \log (30)$$

$$K = 1 + 3.3 \log (1.47)$$

$$K = 5.85 > 6$$

$$R = 120 - 90$$

$$R = 30$$

$$AC = R/K$$

$$AC = 30/6$$

$$AC = 5$$

DATOS	F	Fa	Fr	Fra	Fr%	Fra%	MC
(90-94)	2	2	0.06	0.06	6%	6%	92
(95-99)	8	10	0.26	0.32	26%	32%	97
(100-104)	5	15	0.16	0.48	16%%	48%	102
(105-109)	4	19	0.13	0.61	13%	61%	107
