

SAUL'S STORY

Hello my name is saul de jesus villatoro gomés. I am 21 years old and I am from the city of Comitán de Domínguez Chiapas.

I really like spending time with my grandparents as they tell me what the story is like and they don't want me to make the same mistakes they did.

I was in the park, me and my grandmother and she tells me that my uncle promised my grandmother to have many animals and he wants her to have the same ones.

One afternoon I was with my cousin at my grandparents' house it was a very beautiful afternoon and we promised ourselves to always be for everything and to be until the end of our university studies, since for our parents it is a great emotion to improve our future, since my cousin promised to have a house on the shore of the beach.

He concluded.

Good advice will always come from people who really want the good for you, no matter the age or the limit you set your mind to.
