The story of sandra

Sandra guadalupe morales guzman was born in the city of comitan de dominguez, Chiapas, México. I have one sister who is 26 years old and a younger sister who is 13 years old. When I was 4 years old, I used to play with dolls and check on them to make sure they weren't sick. If they were, I would put band-aids on them to help them feel better.

I attended preschool and Elementary school in maravilla Tenejapa, Chiapas. The school was just three blocks away from my house. I loved playing with my dolls and going for walks in the mountains.

When I was 16 years old, some people came to my school (I was attending cobach at the time) to promote the medical career. From that moment on, I became very interested in nursing. I enjoyed being punctual with my homework, as my teacher would tell me that it made us responsible for delivering it on time.

When I entered my final year of cobach, we had to start thinking about what we wanted to study in the future. My parents always supported me in my studies, and they asked me what I wanted to study. At first, I wanted to study medicine at military college, but unfortunately, we didn't have enough money to cover the costs of transportation and other expenses. So, I decided to work and save money to study.

I got married three years ago and had a baby named Josue, who has been my motivation to continue my studies. I had to find a job to support myself while I studied on weekends. Today, I am studying for a degree in nursing, and I pray to God to help me move forward and graduate so that I can practice my profession.
