Comitán de Domínguez Chiapas a 27 de enero de 2024

Hello, my name is Rossaine but they call me rosi. i was born on april 11, 1999. i am originally from frontera comalapa and i currently live in comitan because last year i started studying my nursing career.

i graduated from high school in 2017 but i did not want to continue studying and then i started working, but in that same year my mother got pregnant so i stop working to help her with the household duties since she was the only daughter and because even i was happy to have another little brother. two years later i decided to travel to cancun with a friend, i spent 6 months working and knowing places around, where i also met very kind and nice people to me, but one day suddenly i felt nostalgic and i just wanted to return to my house because i missed my family so i traveled back to my home, and since then i didn't go out again, i was in my house and i found a job in a medical office where i was working for 4 years where i met many people as well as professionals and patients who told me a nurse (though i was not), and there came a moment where they motivated me and it also motivates me to want to continue studying so i can support my family and the people who need care for their health.

Soo i started in 2023 i registered for uds but due to reasons of insecurity and problems what was going on in my town i could not continue so i unsubscribed and then at my job they had to close the clinic for the same reasons. so i decided to move, to start again here in comitan, i looked for a job where i was going very well at the moment and so i wait for there to be registrations again and return with the career, where currently i am starting the second quarter and looking forward to it to be able to finish the bachelor's degree.
