The past of my life.

Hello, good morning, I will tell you one part of my life, in where the time walk slowly but my time run. When I finished my secondary I didn't think to continue studying so I enrolled in a program called CONAFE in that program you go to teach students in small communities, in the community where I taught when I was teaching I valued many things that I had in my house, be with my parents, the food and the comfort.

I finished one year of service, then I returned to high school, in where I had complications for my irresponsibility. I didn't study the university for two years because I studied mechanics courses and I worked.

I was working like a mechanic, I returned to university, I couldn't finish but today I am working and I give me one opportunity to continue learning new knowledge in where the time doesn't stop.

Thanks.
