## ABOUT ME

Currently, I am a student, I like to promote the importance of mental health.

I am easy to get along with.

I am always open to learn new things.

I am good at accepting outside criticism for a better development of my work

. I like to have new work experiences, always looking for a way to be professional.

In two years I would like to make a foundation on mental health, I would also like to do free therapy or perform some service in a public school of scarce resources.
