

My graduation

My graduation was in Juli of last year the event was in the unach auditorium I was very happy because after so long the moment I had been waiting for had arrived I was outside the auditorium waiting for my friends to arrive so I could take photos, after they arrived we went in and sat with our godparents we waited for everyone to arrive so we could start the ceremony and after an hour it started although not everyone arrived they welcomed us then one my friends came by to read some farewell words I started to cry like many others the moment came when they started calling everyone as a group and my parents, my sister and I got very excited, twenty minutes later it was our group's turn and we formed up by list number, we were all very nervous and happy they began to call one by one and each time it was almost time for me to pass the moment arrived when they said my name and at the same time time they started recording me at the time.

It was something very moving since my parents were very happy that another stage in my life had ended I was happy since it was three year of study but it was worth it, I also felt sad since I would not see many of my friends again.
