Nombre de la Materia : English 4

Nombre del profesor : Deicy Fabiola López

Nombre de la Licenciatura : Tecnico en enfermeria

Cuarto Semestre

Introduction

In this comparison, I chose three sports cars: the Mazda RX-7, the Porsche 911 GT3 RS, and the Koenigsegg Jesko Absolut. I picked them because each represents a different era and engineering style. The RX-7 is known for its rotary engine, the Porsche for its track performance, and the Koenigsegg for its hypercar status.

Comparisons

The Mazda RX-7 is lighter than the Porsche 911 GT3 RS, making it more agile in tight corners. However, the Porsche is faster than the RX-7 in acceleration and top speed due to its modern technology. The Koenigsegg Jesko Absolut is more powerful than both, with an incredible top speed potential.

The Koenigsegg Jesko Absolut is the most expensive of the three, and also the most powerful. The Porsche 911 GT3 RS is the most balanced for track use, while the RX-7 is the most iconic in JDM culture.

Conclusion

My favorite is the Mazda RX-7 because of its unique rotary engine and timeless design. It may not be the fastest or most powerful, but it has a special place in automotive history and my personal taste.
