Express & React

My grandmother is not well, she has a heart condition and suffers from high blood pressure. You should eat more fruits and vegetable, drink wáter, and take the pills the docto recommended. Grandma mustn't eat sweets, cookies or pork. If i take karate clases, I will learn self-defense and disciplina. In my opinión, pollution is destroying the lives of fauna and flora. It is a serious problema that affects human health, causing diseases. Pollotion damages the air, water, soil and has negative consequencen in the short and long term.
