A DAY BEFORE THE EXAM

I study every morning before breakfast, and my sister helps me with exercises. Today is very important because tomorrow. I have my final science exam. Right now, I am reviewing my notes, and my teacher is explaining the final project online.

I have completed all the practice tests, and I have studied hard for the past two weeks. My classmates have already chosen their exam topics, so everyone is getting ready.

Tomorrow at this time, I will be taking the science exam. Next week we will be preparing for the oral presentation. By Friday, I will be studying for the final history test.
