Incidencia y prevalencia

Manifestaciones

Complicaciones

```
graph TD; A[Complicaciones] --> B[Cardiacas]; A --> C[Ojos]; A --> D[Renales]; A --> E[Sistema nervioso]; B --> B1[Cardiomegalia]; B --> B2[isquemia]; B --> B3[IAM]; B --> B4[IC]; C --> C1[Hemorragias retinianas]; C --> C2[edema de papila]; D --> D1[Alteración de funciones renal]; E --> E1[Accidente cerebrovascular];
```

A hierarchical flowchart starting with the word 'Complicaciones' at the top. A vertical line descends from it and splits into four horizontal branches, each ending in a downward-pointing arrow. These arrows point to the categories 'Cardiacas', 'Ojos', 'Renales', and 'Sistema nervioso'. From each category, another arrow points down to a list of specific complications. Under 'Cardiacas' are 'Cardiomegalia', 'isquemia', 'IAM', and 'IC'. Under 'Ojos' are 'Hemorragias retinianas' and 'edema de papila'. Under 'Renales' is 'Alteración de funciones renal'. Under 'Sistema nervioso' is 'Accidente cerebrovascular'.

Cardiacas

Cardiomegalia
isquemia
IAM
IC

Ojos

Hemorragias
retinianas
edema de papila

Renales

Alteración de
funciones renal

Sistema nervioso

Accidente
cerebrovascular

Prevención primaria

Patrones dietéticos
